

Finance Hotel Demo

How AI Turns Business Data

Into *Financial Insight*

From thousands of hotel booking rows to clear decisions.

BEFORE AI

Thousands of rows. Where do you even start?

119,000+

hotel booking records

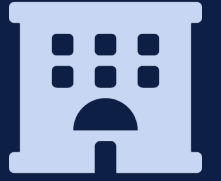

30+ columns: lead time, room type, deposit, rate, market segment, cancellations.

A person could analyze this - but it takes hours.

hotel	lead	room	deposit	ADR	cancel
...	...	...	...	...	...
...	...	...	...	...	...
...	...	...	...	...	...
...	...	...	...	...	...
...	...	...	...	...	...
...	...	...	...	...	...
...	...	...	...	...	...

...and 119,381 more rows

THE SETUP

Imagine you manage a hotel.

We give AI the raw file and ask it one plain-English question:

THE PROMPT

“Analyze this hotel booking dataset as a revenue management analyst. Identify the main drivers of cancellation risk, monthly revenue trends, and high-value guest segments - then write a short management summary for non-technical executives.”

LIVE DEMO

Watch AI work through the file in real time.

WHAT TO WATCH FOR

Four business answers - in minutes

1 Demand & revenue trend

Which months are strong, which are weak

2 Cancellation risk

Which bookings are most likely to fall through

3 Guest-segment profitability

Which channels bring reliable revenue

4 Management memo

A plain-English summary leaders can act on

YOUR TURN

Now do it with *your own numbers*

Individuals

Bank statements · credit-card statements

Small business

Company GL · bank & card statements
